

Data submitted in the online application form will be merged with the information you provided in your registration. The database then generates one PDF including all entries, your CV and university records. Recommendation letters uploaded by your referees will be automatically added.

Before you begin, please consider the two following potential sources of errors/problems:

### 1) The calendar tool

The online form uses an interactive calendar tool. In order to avoid mistakes, we recommend to select the date in the following order: year; month; day. By clicking twice on the “month-year” field of the calendar, you will be able to choose the year.

### 2) Issues with your browser or internet connection

Our application form works without interim data storage of the information you filled in. Therefore, you need to fill it in at once without closing your browser. It should not matter how long it takes you to fill the forms in, but we recommend to have your documents prepared and to avoid longer breaks while completing your application. If you take a long break while filling in the forms, a short interruption of the Internet connection can set the form back to the start when you click on the “next” button in order to switch to the next page. If this happens, please close the browser and start again.

---

**If you have other technical problems to fill the form or if content is lost when you go to the next page, we strongly recommend changing the browser. Individual settings of your Internet browser can cause problems with interactive forms.**

---

**Please notice that once submitted, the application cannot be changed!**
