

YOUNG INVESTIGATORS IN EPIGENETICS

19 May 2016

16:00-18:30

Seminar Room
Institute of Molecular Biology (IMB)
Mainz, Germany

Sigurd Braun

*Biomedical Center, Munich,
Germany*

Control of heterochromatin
localisation and silencing by the
nuclear membrane protein Lem2

Marcus Buschbeck

*Josep Carreras Leukaemia Research
Institute, Barcelona, Spain*

A histone variant links chromatin
state and metabolism

Ragnhild Eskeland

University of Oslo, Norway

Untangling the mysteries of H2A.Z
variants in embryonic stem cells

Guillaume Filion

*Centre for Genomic Regulation (CRG),
Barcelona, Spain*

HIV and chromatin: a love-hate
relationship

Juan M Vaquerizas

*Max Planck Institute (MPI) for
Molecular Biomedicine, Münster,
Germany*

Transcription nucleation of
topological domains during
embryogenesis

Scientific Organizer:

Vijay Tiwari
Institute of Molecular Biology (IMB)
Mainz, Germany
